Stay ahead
of the game
for wireless
metering and
Industrial IoT

10
years of experience
in field roll-out

15
million
smart meters

Extend your network for further business partnerships and new market opportunities!

Industrial IOT

Be an active player in the development of the best proven wireless Smart Metering Solution

Business

Extend your network for further business partnerships and new market opportunities

Technology

Easily develop products interoperability and stay one step ahead of standardization

Ecosystem

Innovate and participate in the development of new use cases with compliant product suppliers

Already proven in **500 cities** across **15 countries** throughout Europe, Africa and Asia

“The Wize technology is a sustainable, global, robust and easy to deploy IoT network, providing solutions to new urban challenges.”

- Less energy consumption
- Minimized radio infrastructure
- Optimized TCO
